

# The KEN grant

## A future of efficient disinfection

We strive to stimulate research, activities and development projects focused on infection prevention. Dissemination of knowledge regarding infection prevention is very near to our hearts and that's why we support this cause - 25 years running.

The grant amounts to EUR 3,000 (DKK 25,000) and is awarded once annually at the DSIF Annual Meeting in March. The grant must be used within one year or by separate agreement.

Applicants are typically nurses, doctors, pharmacists, marine engineers, or other healthcare employees. We encourage anyone with an interest within the field of infection prevention to apply for the grant.

The recipient must be willing to present the project or to submit a report and be present at the annual meeting. Participation in the grant distribution is conditional upon the applicant's acceptance of the above-mentioned conditions.

We assess all applications 2-3 weeks after the application deadline. The grant recipient will be advised prior to the ceremony at DSIF.

It is a requirement that you attend the annual meeting and are a member of [DSIF](#) in order to be awarded the grant.

Before submitting the application, the applicant must ensure they are eligible to receive grant funding from a private company under applicable regulations and any internal guidelines of their institution or organization.

The application deadline is 1 March 2027.

# Application form

Please fill out the details below

**Name**

**Email**

**Title and organisation**

**Motivation and project description** (Alternatively, add project descriptions, files and documents to the application email)

**Total budget** ( EUR or DKK )

Please send your application to [marketing@ken.dk](mailto:marketing@ken.dk) - Thank you for applying.

All applications are managed according to our [privacy policy](#).
